Education

Brandeis University

Expected May 2026

Bachelor of Science in Computer Science — GPA: 3.5

Waltham, MA

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Software Engineering(Capstone), Python, Machine Learning, Mobile and Web Development, Human-Computer Interaction, Operating Systems, User Experience Design.

Skills

Languages: Python, JavaScript/Typescript, HTML/CSS, Ruby

Full-Stack: Frontend (React/NextJS, Tailwind CSS) | Backend (Ruby on Rails, NodeJS, Java) | Mobile (React Native)

Tools: Git/GitHub, Docker, VS Code, Figma, Slack

Work Experience

Grove Partners

July 2024 - September 2024

Software Development Intern

Watertown, MA

- Developed, tested, and deployed 3 full stack features using Ruby on Rails, including the implementation of user interfaces, database integrations, and back-end functionalities, resulting in a user-friendly platform.
- Built 2+ responsive landing pages from Figma designs using Ruby and Tailwind CSS contributing to improved user engagement.
- Maintained an established production codebase, using Git, Test-Driven Development, and regular code reviews, gaining experience in the software development process and optimizing the application to serve hundreds of users.
- Delivered weekly progress reports and a final internship presentation to the CEOs and 2 team members, showcasing completion of 4+ development tickets and key project milestones.
- Gained hands-on mentorship from co-founders through weekly 1:1s , significantly improving skills in full-stack development, code reviews, and building skills in purpose-driven leadership and goal-setting.

Projects

SmartPantry | React-Native, Expo, Supabase, Figma

September 2025 - December 2025

- Built a mobile application using React Native and Expo, enabling users to efficiently add items to their virtual pantry inventory in real-time as well as a barcode scanning feature and real-time database updates.
- Developed a modern, responsive UI from scratch using React Native and custom StyleSheet components, iteratively refining the interface based on stakeholder feedback and usability requirements.
- Collaborated with a 4-person development team using Git version control and agile methodologies, contributing to regular code reviews and maintaining clean, documented code while meeting bi-weekly sprint deliverables.
- Led development status presentations in front of over 20 classmates and maintaining project documentation standards, including detailed meeting minutes to ensure clear communication of project progress and roadblocks.

Crowning Games | Figma

June 2024 - August 2024

- Designed and developed a user-friendly website for an indie game studio reaching 100s of people, which focused on game and studio information, newsletter sign-ups, and social media integration.
- Worked closely with the UI/UX Game Designer to ensure the website meets design and functionality standards in anticipation of the Steam page release.
- Utilized Figma for creating and iterating on wireframes, mockups, and prototypes to design an intuitive and visually appealing website.
- Conducted user testing sessions to gather feedback and iteratively improve the website's UI/UX before the launch.
